

MARYLAND MADE EASY.

is working across state agencies to identify and remove barriers to business success.

GOALS:

- › increase business interface with state government through stakeholder groups
- › reduce bottlenecks, miscommunications and burdensome regulations on businesses
- › establish a system for expedited state review of major projects

HOW IT WORKS:

- › The Commission on Small Business is identifying most burdensome rules and regulations to address
- › An inter-agency committee will coordinate the State's response to business issues
- › Responsible agencies will regularly report on resolution of issues

SOLUTIONS IN DEVELOPMENT:

- › **Centralized Business Licensing System:** a one-stop shop online system for all business licenses and permits
- › **FastTrack:** expedite state review of qualifying development projects designed to allow high-impact projects to receive increased Executive attention so that economic benefits are realized as quickly as possible.
- › **State Highway Administration New Access Permit Process:** new process makes it easier to obtain permits for development projects

HOW TO GET INVOLVED:

The participation of the business community plays an important role in the program's success. Visit Maryland Made Easy online at Easy.Maryland.Gov and tell us what you think the state could do to streamline processes and make it easier to do business in Maryland.
